

OOP Development Workflow

Create two files in the same folder:

- `ExampleClass.java`
- `ExampleClassRunner.java`

Workflow:

1. Add code to `ExampleClassRunner.java` and `ExampleClass.java`
2. Save your changes to both files
3. Build `ExampleClassRunner.java`
4. Debug, then save and re-build.
5. Run `ExampleClassRunner.java`
6. Debug, then save, re-build, and re-run.
